<b>Written Public Comment:</b>	<p>I have a couple of questions for Board President (and I&amp;R Committee Chair) Dean. Mr. Webb &amp; Mr. Williams are leading the I&amp;R Ad Hoc Committee on Long Term Water Storage and Flood Control. Since the Ad Hoc Committee's formation, there have been no progress or status reports from this Ad Hoc Committee. Has the Ad Hoc Committee or Staff drafted the work plan, schedule, and proposed deliverables for this Item? And, when will they be sharing these with the I&amp;R Committee Chair, Board, Staff, and the public? As you know, this work is an urgent part of the Strategic Plan, and is supposed to be included in the Strategic Plan Item 5 Matrix update presented at every Board Meeting. Once again, if you or the Ad Hoc Committee members are short on staff or other available technical resources and need some help developing these materials or other analyses, I am offering my technical consulting services in this regard Pro Bono.</p>

GENERAL MANAGER McELHENIE, STAFF, AND PRES. DEAN AND MEMBERS OF THE BOARD:

I attended the May 31 day-long public meeting with General Manager McElhenie and truly appreciate the opportunity to get to know our new general manager and express my thoughts about and wishes for our wonderful community. Thank you! And thanks to members of staff and board members for being there as well.

President Dean provided a wonderful selection of her delicious baked goodies. Thank you!

I hope that the entire community takes advantage in the future of these opportunities to interact with the general manager, staff, and board members.

It is great to have a new general manager reaching out to the public and I look forward to that communication continuing. I also found that Mr. McElhenie's experience and compassion as a paramedic became a real benefit to me but I won't go into THAT. Also, I appreciate Ms. Dodson's concern. This feels like a REAL community.

Thank you all,  
Donald Archer  
Cambria
